

For the 2008-2009 race season we had the following age group high performance statistics:

1. Seven male athletes met all the performance criteria and achieved the A time standard. One female athlete didn't make the eligibility time.
2. Two male athletes and three female athletes met all the performance criteria and achieved the B time standard.
3. Four of the eligible male athletes competed at the 2009 Canadian Triathlon Championships resulting in 3 medals; one gold, one silver, one bronze and a tenth place finish.
4. No eligible female athletes competed at the National Championships.
5. In addition to the four athletes who qualified for funding, four other Manitoba athletes competed at the 2009 Canadian Triathlon Championships. The results for these four athletes included: one gold, one silver, one eighth place and one ninth place finish.

Recommendations for the 2009-2010 age group high performance program:

1. Clarify the events that can be used to meet the three sanctioned events requirement.
