

Equipment Report

Submitted by: Nancy Drad

The equipment is stored in a large garage in Stonewall, located on the property of Big Block Auto and Farm Supply.

Electrical Equipment (radios, race clock, and sound system) will once again be stored at the residence of Nancy Drad over the winter months as the storage facility has no heat. This will prevent moisture damage.

Equipment

Joshua Drad returned to the position of equipment manager. This season there were 11 events that required him to dispense and receive the equipment.

Everything went smoothly.

An inventory of the equipment will be done prior to Thanksgiving weekend by Joshua Drad, Quentin MacCharles and myself.

This year 100 feet of new green carpeting was purchased and two of the radios were replaced. The funds to cover these two expenses came from the increase in fees that was directly deposited into an equipment fund.

After the inventory is complete decisions will be made on replacing the large Race in Progress signs and perhaps replacing the two canopy tents with easy-up tents. The canopy tents are old, heavy and cumbersome to transport. The problem also arises when races do not put all the right tent pieces into the canvas bags. Easy-up tents are complete units and therefore it is impossible to not pack them properly.

A couple of the Gatorade jugs were broken but it is felt that it was due to old age. No need to replace them as there are many others in stock. One of the yellow buoys was retired due to a large leak. No need to replace as there are still some spare yellow buoys in stock.
